

YOU'RE INVITED

Virtual Seminar: Aerobic Granular Sludge Technology

April 30, 2020 | 10:30 a.m. – 2:00 p.m. (cdt)

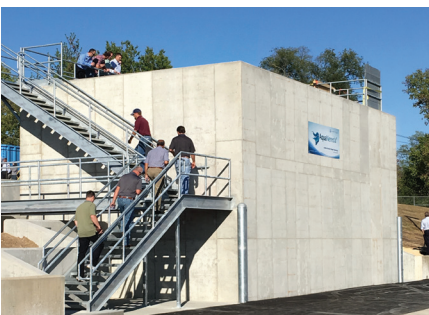

Aqua-Aerobic Systems is excited to offer wastewater professionals with an online Process and Product Application Seminar that will focus entirely on **Aerobic Granular Sludge Technology**. The seminar will include an introduction to the technology and discuss plant design and process configuration. Our expert presenters will showcase current installations, including the first AquaNereda® plant in the U.S. This online seminar will include several interactive components including a virtual tour of the [AquaNereda® Demonstration Facility](#) and a real-time Q&A segment.

ATTEND THIS VIRTUAL SEMINAR TO GAIN A BETTER UNDERSTANDING OF:

- How granules are formed from conventional activated sludge
- How the process works
- The operation of aerobic granular sludge technology through a full-scale plant tour
- Process performance
- How aerobic granular sludge handles peak flows and loads
- Best applications for the process

Upon completion of this online seminar, you will receive a certificate of completion including Professional Development Hours (PDH).

A virtual video tour of the full-scale AquaNereda® treatment plant at the Rock River Water Reclamation District will be included as an interactive component of the seminar.

This information can be invaluable to a wide range of wastewater treatment professionals including:

- Engineers
- Consultants
- Plant Managers
- Operators
- Contractors
- End Users

[PLEASE CLICK HERE TO REGISTER](#)

Register by Monday, April 27th. Upon receiving your completed registration, you will receive additional login instructions and an e-gift card of your choice for lunch.

Please direct any questions to our Seminar Coordinator, **Monica Gunderson**, at MGunderson@aquaaerobic.com.
